

CLIENT:  
**Los Angeles County Probation Office**

PROJECT:  
**Creating a New Building Footprint**

**BUDGET:**  
\$2,378,983

**PROJECT MANAGER:**  
Frank Rodriguez

**SCOPE:**  
The scope of this project required that Torres Construction excavate and re-compact the soil to create a new building footprint.

**SUMMARY:**  
This project was challenging because of the excavation depth (22 feet) and its proximity to the existing structure, a busy intersection, and a public sidewalk. Special precautions had to be taken to ensure the safety of the general public as well as the office occupants. The project was a complete success and was finished on time, within budget, and with a zero punchlist.
